

V1.3 preview

# **V1.3 - Key improvements VS 1.2**

# **V1.3 - Key improvements VS 1.2**

- New database design

## **V1.3 - Key improvements VS 1.2**

- New database design
- Improved proprietary tiling engine

## **V1.3 - Key improvements VS 1.2**

- New database design
- Improved proprietary tiling engine
- New web engine

# New database design

# **New database design**

- 4 to 200 times faster database design (VS 1.2)

# **New database design**

- 4 to 200 times faster database design (VS 1.2)
- 20 to 30 % overall experience acceleration (VS 1.2)

# Improved patented tiling engine

# Improved patented tiling engine

- 2 to 4 times faster zoom display (VS 1.2)

# Improved patented tiling engine

- 2 to 4 times faster zoom display (VS 1.2)
- 50 % less server's CPU and IO needs while zooming

# **New web engine - Zend server**

# **New web engine - Zend server**

- 80 % less server's CPU when idle (VS 1.2)

## **New web engine - Zend server**

- 80 % less server's CPU when idle (VS 1.2)
- Thousands of users per CPU (VS hundreds in 1.2)

## **New web engine - Zend server**

- 80 % less server's CPU when idle (VS 1.2)
- Thousands of users per CPU (VS hundreds in 1.2)
- Clustering and Load balance capabilities

# **VI.3 - New features**

# **VI.3 - New features**

**- Actions**

## **VI.3 - New features**

- Actions
- Sequential decision tree

## **VI.3 - New features**

- Actions
- Sequential decision tree
- Check before notify

# Actions

# Actions

- File copy, move or delete based on triggers

# Actions

- File copy, move or delete based on triggers
- File copy, move or delete based on schedule

# Actions

- File copy, move or delete based on triggers
- File copy, move or delete based on schedule
- Custom email notification based on both

# Sequential decision tree

# Sequential decision tree

- Step approvals with deadlines

# Sequential decision tree

- Step approvals with deadlines
- Tree approval on each step

# Sequential decision tree

- Step approvals with deadlines
- Tree approval on each step
- Variable tree on each step

# Check before notify

# Check before notify

- Keeps control on automated notification flow

# Check before notify

- Keeps control on automated notification flow
- Sticks closer to users' needs
